

WP 4 Leader, Gabriella Vadasz-Bognar

M.Sc. (Mechanical Engineering)

I am professor and head of the institute, Institute of Machine and Product Design at the University of Miskolc. I have got a PhD at the Hungarian Academy of Sciences (HAS) in mathematics, and became the Doctor of the Hungarian Academy of Sciences (DSc) in mechanical engineering sciences. I did my habilitation (dr.habil.) at Miskolc in 2006.

In RePCi project I coordinated the Work Package 4 Resource alliance, which aimed to create a resource pool by companies and HEIs easily available and improving the competitiveness of companies.

This project was extremely useful, interesting and fruitful in professional, personal and multicultural point of view. I am sure we can integrate the incomes of this project into our professional life and into everyday cooperation with companies.

It was a good job with excellent partners.
