

WP 6 Leader, Jouni Jurvelin

PhD (Environmental Sciences), BEng (Mechanical Engineering)

I am a study coordinator and senior lecturer at School of Technology in JAMK University of Applied Sciences. I have got a PhD at University of Eastern Finland in Kuopio in 2003.

In RePCI project I coordinated the Work Package 6, Quality Assurance. This project was useful for me from both professional and multicultural point of view. I look forward for the new challenges in other same kind of projects. Thank you for the project partners about the cooperation in the RePCI.
