

WP 2 Leader, Pasi Ahonen

M.Sc. (Paper Technology)

I am Senior Lecturer, Paper Machine Technology at the JAMK University of Applied Sciences. In the past I have worked at Metso Paper/Valmet, Mreal and RGE Group, China.

In RePCi project I coordinated the Work Package 2 REENGINEERING OF COMPANY - HEI - COOPERATION BASED ON THE NOVELTY FACTORS. Target was to find competence areas which would be common for our Partner companies and us.

Working for this project has opened my eyes what it comes to needs and rhythm the companies have in their strategic future competencies. To be able to response to the market needs will be a challenge for Higher Education Institutions.

With such good partners and people we are ready to answer the challenge in the future.....
