

Final survey

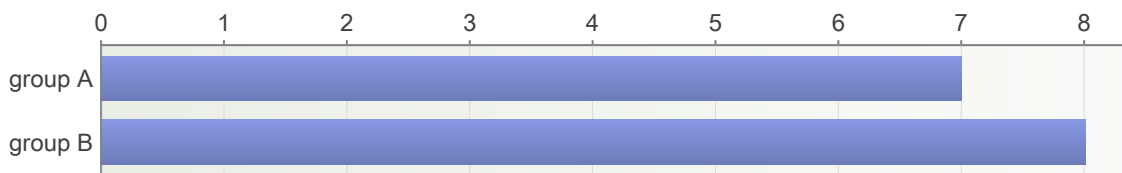

1. At which university are you studying.

Vastaajien määrä: 15

2. Which project group do you belong to.

Vastaajien määrä: 15

3. The project task has been clear from the beginning on.

Vastaajien määrä: 15

	+++	++	+	-	-	-		Yhteensä	Keskiarvo
strongly agree	7	6	1	0	1	0	strongly disagree	15	1,8

4. If there has been problems during the project related to project tasks describe these in the following:

Vastaajien määrä: 2

-
- Some date wasn't clear.

5. The contact person at the company relating the project has been available for questions.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskisarvo
strongly agree	1	8	4	1	1	0	strongly disagree	15	2,53

6. I have been satisfied with the response of the contact person of the company in context of questions relating project work.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskisarvo
strongly agree	7	5	2	0	1	0	strongly disagree	15	1,87

7. How satisfied you are with the result of the project work?

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskisarvo
absolutely satisfied	7	8	0	0	0	0	not satisfied at all	15	1,53

8. How useful you think that the result of the project is for the company?

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskisarvo
very usefull	8	5	1	0	1	0	not usefull at all	15	1,73

9. How satisfied you are with the final presentation of your project group?

Vastaajien määrä: 15

	+++	++	+	-	-	-		Yhteensä	Keskiarvo
absolutely satisfied	11	3	0	0	1	0	not satisfied at all	15	1,47

10. The knowledge you get from the project work supported your studies.

Vastaajien määrä: 15

	+++	++	+	-	-	-		Yhteensä	Keskiarvo
strongly agree	11	4	0	0	0	0	strongly disagree	15	1,27

11. Which further results of the project you are taking along for your further studies?

Vastaajien määrä: 9

- Project knowledge
- I will use almost all of the learned knowledge in the future, I was able to learn a lot of thing about team work and 3D modelling.
- Risk analyzing, failure mode method, project planning, team coordinating, motor analyzing
- Cooperation skills, working in an international team will follow me in my whole life!
- I think I will be able to work in another projects in the future.
- Skills in English language and working in group. Also FMEA chart was very usefull.
- The whole project work was very useful for me. I learn a lot of new thing I can use my further studies.
- Social skills
- I'm sure I will use project development skills.

12. What differences if any between the way of working of the students from different countries you noticed?

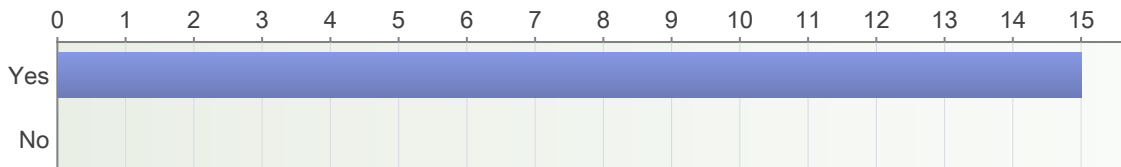

Vastaajien määrä: 9

- We value a bit different kind of things.
Some values more reports and some values more calculations or pictures.
Some of us likes to work late at evening and some of us likes to work at day time.
- There was a few difference. For example from the other country the students had more knowledge about how to build up a project work, but we had more knowledge about engineering I think.
- all of hungarian students concentrated for the engineering work at the start of the project, started with calculations
unlike the finn students who are good at planning, started build up the project
- Finnish are more strict with deadlines, and more focused on their next task.
I think hungarians are looking more into the future, and searching for easier ways to reach their goal.
- Working in a real project was new for hungarian students. According to this, our working attitude was different from Finnish way of working. Hungarian working attitude is more individual, I think. But the reason of this is in the history of hungarian higher education.
- Hungarian students didn't want to do any scheduling. They just want to do the product.

- I think the Finnish students didn't work so hard as the Hungarian. It wasn't enough a month to make a new design for some parts.
- Finnish students were little more organized and aware of timing. Hungarian students wanted a lot of results in a short time and sometimes forgot what is essential.
- In Hungary mainly we learn individual works. In Finland they do more team workings.

13. Do you see a balance between your commitment to the project work and the result that came out of the project for you?

Vastaajien määrä: 15

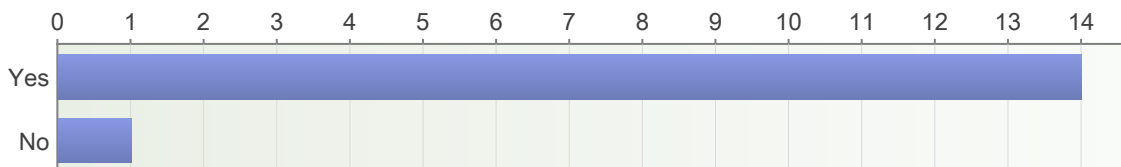

14. If NO, please give your reasons for your answer in following:

Ei vastauksia.

15. Would you like to take part again in ICP?

Vastaajien määrä: 15

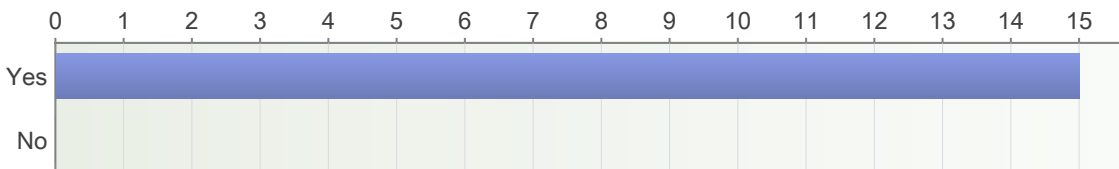

16. Whether YES or NO, please give your reasons for your answer in the following:

Vastaajien määrä: 12

- It was awesome :D
- My language is much better now.
I learned so much how different we are to work in these kind of projects. Some of us are better to take leader than the other and some of us are better to take instruction.
"My way or the highway" is not good leading method.
- I think it was a good experience, and if I could take part in another ICP then I would be able to do things better. I was able to get to know other country's students and I think it is a big advantages for us.
- Beside the chance of study of project work and group working, see other students working method and gain a lot of experience it is a good possibility to improve the english skills, visit foreign country and make friendships
- I liked it very much. A new ICP means new people, new project subject, new company, new opportunities, so yes, I would willingly take part in a new ICP.
- ICP was an excellent solution for studying, working and also entertainment.
- This is the way how I want to learn new things.
- It was a great possibility to to improve my english skills, and to know foreign culture. I liked this project work, because I could know new people in a foreign country.
- I think one time is enough for now.
- It was a good possibility to improve my foreign language speaking and presentation skills.
- This is an unmissable experience. We learn many things to do in different way then the casual.
- English learning, cooperation with another university

17. Would you recommend ICP to other students?

Vastaajien määrä: 15

18. Whether YES or NO, please give your reasons for your answer in the following:

Vastaajien määrä: 12

- Same answer
- This is so much realistic work than just create something for "we just need to do this for this course".
- It is good to take part in these kind of projects because this way the students can learn about team work and can see what will be there job in the future, and I think it looks quite good in a resume.
- Beside it is a good point in the CV, I just can repeat and say the things in the 16. statement.
- Language skills improving, communication skills improving, presentation skills improving, good experience in the technical field and also in general.
- Working in projects is unavoidable in our world, especially in the industry. Engineers of future have to be able to keep contact from different countries during a living project. ICP gives a strong knowledge for projects. It was amazing to meet students from another country.
- There are so many big companies in Finland where you have to do international projects. Is better to do learning in school rather than in work.

- It is great to improve the foreign language skills, and to take part in a real project with industrial exercise.
- I think it's a great opportunity to try something different while you are studying. It gives you experience in many ways.
- We gained so much experience about how a company works.
- Same as question 16.
- It was fun and useful

19. Now you can have the chance to praise or criticize ICP in general, this can refer to all parts of the project:

Vastaajien määrä: 9

Praise:

- It was a lifetime experience
- good working with lodging.
- Nice people to work with.

Good job overall!

- The teamwork was good, the project manager took seriously his job this way there was not a lot of conflicts in the team.
- We had no a lot of chance to work in group for a bigger project, so this ICP gave me a great experience in group work.....I loved it.
- I like the 2 intensive weeks, and my last sentences were my praise to this ICP.
- I liked the surveys, what means you are interested in our opinions, and open for any comments. Thank you!
- Feedback from Dr. Kakuk was very good. Supervisors from both schools gave good feedback and helped us very much. And project task was good and very challenging.
- The project exercise was very interesting. It was very good for the whole team, and we learned some new things during the project work.
- Great way to get experience. Travelling, social, seeing big company, work with new people.
- Its itself that a cooperation between two different countries can exist is great. And cooperate with an international company also is more great.

Criticism:

- Hungarian students did a lot more work and the intensive week were the worst time for us. Don't make differences with the students.
- Supervisors need to have exact guidelines to students what need to be done, how, when...

Lot of work needs to be done for 5 (study)points.

Equal amount of students could work better than if there is more students on the other country.

- Someone said thing about him or herself that he/she can do different kind of job but in the end he/she were not able to do the work well and that gave a little disadvantage to our team, because if she or he said earlier that he/she can not do it than someone else could have done it.
 - The communication with the finn students was a little difficult, because sometimes spent some days to read my messages and I did not give always answer or information about their working process.
 - We did more than 50% of our job during the intensive weeks, so I think significant improvement can be made by increasing the time spent together.
- I know it is difficult to make the dates and everything else. On the other side, it was the same problem with the communication from the home countries.
- It was hard to make voice conferences, even with a manager type leader.
- Everybody has his/her own exams during the semester, what makes sometimes impossible to work as a team. Even if we have our deadlines here in ICP, we really need to focus on our home subjects. If we fail even one,

we can miss a whole year! Normal people do not risk this, so unfortunately it can be seen in the quality of the work of ICP.

- The choosing the students for the project could be systematic. We are studying more engineering, but we are studying not so much marketing. I think we are very good in solving engineering problems, but we are not so good in solving marketing problems. We adapted very well, but it was not so easy.
- Not much. I think all the problems came from the groups and were solved by them.
- There were some communication problems between supervisors. Not big problems, but 1 or 2 little.

20. I can deal well with cultural differences.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	8	7	0	0	0	0	strongly disagree	15	1,47

21. I have no prejudices against different cultures.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	10	5	0	0	0	0	strongly disagree	15	1,33

22. I can adapt flexibility to new situations.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	9	6	0	0	0	0	strongly disagree	15	1,4

23. I can accept different perspectives.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	9	6	0	0	0	0	strongly disagree	15	1,4

24. I can leave my own point of view.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	6	6	2	0	1	0	strongly disagree	15	1,93

25. In conflicts I can engage in a compromise.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	9	6	0	0	0	0	strongly disagree	15	1,4

26. I can accept that other people have different ways of working.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	10	4	1	0	0	0	strongly disagree	15	1,4

27. I can express my opinion at any time.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	5	6	4	0	0	0	strongly disagree	15	1,93

28. I can say if I disagree.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	9	3	3	0	0	0	strongly disagree	15	1,6

29. I can contribute my ideas.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	10	5	0	0	0	0	strongly disagree	15	1,33

30. In a group foreign to me I can find my place quickly.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	5	8	1	1	0	0	strongly disagree	15	1,87

31. I like to work together with other people to achieve a goal.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	11	4	0	0	0	0	strongly disagree	15	1,27

32. I can express myself with English so I have the feeling I am understood totally.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	9	4	2	0	0	0	strongly disagree	15	1,53

33. If other people around me talk in English I can totally follow the conversation.

Vastaajien määrä: 15

	+++	++	+	-	--	---		Yhteensä	Keskiarvo
strongly agree	12	3	0	0	0	0	strongly disagree	15	1,2

34. I feel really sure in speaking technical English.

Vastaajien määrä: 15

37. If there are more or other competences, which you think you have developed during the project, please list them here:

Vastaajien määrä: 2

- Learning hospitality, and politeness. To work as a real team, you need to be honest with the people of other group, even more then you thought before.
- project work itself
