

Academic year 2023-24

Dear Sir/Madam

INFORMATION FOR MENTORING TEACHERS

Planning and implementation of the teaching (10 ECTS) is a key part of pedagogical studies. It belongs to the broader Facilitating Learning study module worth 14 ECTS. At the beginning of the course, the students will learn about the learning environments and set their personal goals (3 ECTS). The course ends with the self-assessment (1 ECTS).

Every student plans and implements a meaningful teaching module of 3-5 ECTS or 2-3 weeks. It can be for example a course module or separate course, which may include group training, individual counseling, work-based instruction, or web-based counseling. The students at the School of Professional Teacher Education are tutored by a mentoring teacher from their own working community.

PRACTICAL TRAINING AGREEMENT

Cooperation and student guidance between the educational institution where the teaching practice takes place and Jamk School of Professional Teacher Education is governed by the teaching practice agreement. The teaching practice agreement is drawn up and signed electronically in the Workseed-platform. Practical training agreement has to be signed by all parties (student, mentoring teacher and teacher educator) to fulfill the insurance conditions.

I hope that our students will have a versatile opportunity to participate in the daily routines of the working community and the opportunity to receive assistance from other colleagues as well.

We sincerely thank you for your valuable input to the implementation and development of teacher education.

Jamk University of Applied Sciences
School of Professional Teacher Education
